```
class Sample {}
class Product{}
class Employee {
  Sample getSample() {}
  Product getProduct() {}
}

Employee e = new Employee();
e.getSample();
e.getProduct();
---------------------
class Sample {
  Employee and() {}
}
class Product{
   Employee and() {}
}
class Employee {
  Sample getSample() {}
  Product getProduct() {}
}

new Employee()
      .getSample()
      .and()
      .getProduct();
```
